## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by figure 10 of the acknowledged prior art (APA).

Regarding claim 1, figure 10 of (APA) discloses a light emitting display device comprising a plurality of pixels disposed in a matrix form, said pixels including a plurality of first electrodes 109 electrically isolated from each other, second electrodes 115 opposite to said first electrodes wherein one of said first and second electrodes is arranged in a light projecting surface and a light emitting device held between said first and second electrodes, said light emitting device including at least a light emitting layer 113, and a light reflecting surface provided between adjacent ones of said pixels to reflect light traveling from the one of said pixels to adjoining pixels towards said light projecting surface.

Regarding claims 2-5, figure 10 of (APA) discloses all the structures set forth in the claimed invention.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Nishio et al.

Regarding claim 1, Nishio et al discloses on figure 1B a light emitting display device comprising a plurality of pixels disposed in a matrix form, said pixels including a plurality of first electrodes 4 electrically isolated from each other, second electrodes 2 opposite to said first electrodes wherein one of said first and second electrodes is arranged in a light projecting surface and a light emitting device held between said first and second electrodes, said light emitting device including at least a light emitting layer 5, and a light reflecting surface provided between adjacent ones of said pixels to reflect light traveling from the one of said pixels to adjoining pixels towards said light projecting surface.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patent 6166792 to Miyawaki et al discloses a reflection LCD device.
